SIMPLE AND CONVENIENT CONTROL

12-CHANNEL REMOTE CONTROL

A recipe for comfort at your home? 5 buttons and 12 different channels make the NX-Bidi remote an effective management center, among others of the lighting and shutter system. It enables activation of scenarios, designed during configuration, that control devices connected to the Exalus Home System.

DEDICATED EXALUS HOME APPLICATION

You can control devices connected to the control unit at your home or in the office from anywhere in the world. On the way home, you can turn on the heating, and while watching a movie, you can draw all the shutters in the house without the need to stand up from the couch. Don't limit yourself – be SMART!
