SMART SLIDE

Smart Slide is a sliding door, but the innovative closing mechanism allows for simple and intuitive operation, similar to the solutions used in lift-slide doors.

It is worth recommending the system to your clients for another reason. Using it, you can easily make larger structures, in which the sash can reach a size of up to 1.5 x 2.3 m.

The installation depth is 140 mm, and the glazing units can have a maximum width of 42 mm. This means that the doors based on the Smart Slide system are not only functional, they can be used to create large structures, but also have high thermal values.

Smart Slide sliding doors can be equipped with air inlets. We also recommend a full range of smooth and wood-like veneers, thanks to which the doors will adapt to any type of interior or facade.
